

TSI Ventilation and IAQ Products

New Products
March 2011

Agenda

- New products
 - 9565 VelociCalc and 7575 QTRAK Overview
 - Bluetooth Communications
 - Airflow Probe 800187
 - Language Additions
 - Software updates
 - Resources

Agenda

- New products
 - Volatile Organic Compounds (VOC) Probes
 - What are VOC's?
 - Applications and Customers
 - Models and Technology
 - Features
 - Setup
 - Resources
 - Availability

New Products: 9565 VelociCalc and 7575 QTRAK

- Replacing 9555 VelociCalc and 7565 Q-Trak
 - 9555/7565 Asian Language project started last year
 - Original plan was to keep existing model numbers
- Required new pcb and microprocessor
- Create new models
 - Provides us with the opportunity to launch a new product
 - Helps service differentiate between old and new models

9565 VelociCalc and 7575 QTRAK Overview

- The VelociCalc 9565 series is a direct replacement for the 9555
- The QTRAK 7575 is a direct replacement for the 7565
- Same features and functionality as old models
 - Use existing plug-in probes
 - Instrument case look and feel
 - Carrying case and accessories
 - Supports 8934 wireless printer
- No change in pricing

9565 VelociCalc 7575 Q-Trak Models

| Old Models | New Models | New Service Models |
|------------|------------|--------------------|
| 9555 | 9565 | CL-9565-P |
| 9555-A | 9565-A | RP-9565-P |
| 9555-P | 9565-P | CL-9565-X |
| 9555-X | 9565-X | RP-9565-X |
| 7565 | 7575 | CL-7575-X |
| 7565-X | 7575-X | RP-7575-X |

9565 VelociCalc and 7575 QTRAK Overview

- Additional capabilities
 - Bluetooth bi-directional communications
 - Download stored data to a PC
 - Remote polling from a PC
 - Program Test ID names from a PC
 - Supports additional probes
 - Volatile Organic Compounds (VOC) probes
 - **9565-P** can use Airflow probe (straight pitot probe) Model 800187

9565 VelociCalc and 7575 QTRAK Overview

- Additional capabilities
 - Added four Asian languages
 - Traditional Chinese
 - Simplified Chinese
 - Japanese
 - Korean
 - Added dots to soft keys
 - Updated LogDat2 and TRAKPRO software
 - Updated instruction manual
 - Updated specification data sheet

Bluetooth Bi-Directional Communications

- Communication via Hyperterminal or other terminal emulation software
 - Not supplied by TSI
- Download stored data
- Remote Polling
 - Data analysis
 - Trending
- Range: 100 ft. (30 m)

```
-----

Bluetooth Bi-Directional Communications

Bluetooth® Communications for the Model 9565 VELOCALC® Meter and Model 7575 Q-TRAK™ Monitor

Application Note TSI-150

The Model 9565 VELOCALC meter and Model 7575 Q-TRAK IAQ monitor feature Bluetooth wireless communications for use with a Bluetooth-enabled computer. A computer can command the VELOCALC or Q-TRAK meter to:

- Reply with model and serial numbers of the VELOCALC or Q-TRAK meter and the currently attached probe.
- Reply with current values for all measurements to be logged.
- Reply with logged data either for a particular TestID or all TestIDs.
- Change the names of TestIDs used to log data.

Bluetooth Communications Requirements

Bluetooth communications between a TSI instrument and computer require Bluetooth communications and use of a terminal emulation program, such as HyperTerminal, be installed on the computer. This application note assumes that you already have Bluetooth communications installed on your computer. If your computer does not have Bluetooth communications, purchase and install a Bluetooth dongle or another means of Bluetooth communications. HyperTerminal is included in Windows® XP and earlier operating systems, but not in Windows Vista® or Windows 7 operating systems.

- For Windows XP operating system or earlier, you can find HyperTerminal by clicking on the Start button, then All Programs, Accessories and finally Communications.

If HyperTerminal is not installed on your computer, install it by opening the Control Panel, selecting Add or Remove Programs, selecting Add/Remove Windows Components, and choosing HyperTerminal.

- For Windows Vista and Windows 7 operating systems, obtain and install a terminal emulation program. Purchase HyperTerminal from Hilgrneve or obtain another terminal emulation program.

Bluetooth is a registered trademark of Bluetooth SIG. Microsoft, Windows, Vista, and Excel are registered trademarks of Microsoft Corporation. TSI and VELOCALC are registered trademarks of TSI Incorporated. TSI logo and Q-TRAK are trademarks of TSI Incorporated.

Bluetooth Setup

Bluetooth data transfers occur over a Bluetooth Serial Port. To determine the COM Port of the Bluetooth Serial Port:

1. Right-click the Bluetooth icon in the lower right-hand corner of the screen.
2. Select "Bluetooth Configuration" as shown in Figure 1.
3. Determine the COM port used for Bluetooth communications. Depending on the drivers on your computer, the COM Port used may be on the Communications Port tab, Local Services tab, or elsewhere. Take note of the COM port for later use.
4. Select the Start up automatically checkbox, which may be found by double-clicking the Bluetooth Serial Port in the Local Services tab as shown in Figure 2, to allow the TSI instrument to connect in the future without going through this process.
5. Ensure that the TSI Instrument can find your computer by selecting Let other Bluetooth devices discover this computer, on the Accessibility tab as shown in Figure 3.
6. Select the OK button to save changes and exit.

Note: You may have to press the OK button on more than one window.

Figure 1. Selecting Bluetooth Configuration.

Figure 2. Selecting Bluetooth Serial Port.

Figure 3. Enabling Bluetooth Discovery.

Application Note TSI-150

Airflow Probe

- Straight pitot probe
 - Duct traversing
- Applicable with the 9565-P
 - Range: 250 to 15,500 ft/min (1,27 to 78,7 m/s)
 - Accuracy: $\pm 1,5\%$ at 2000 ft/min (10,16 m/s)
 - Resolution: 1 ft/min (0,01 m/s)

Airflow probe

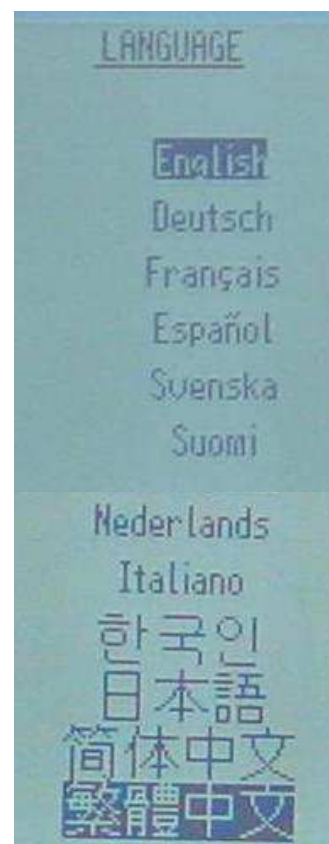

- Small diameter ductwork
 - Standard pitot probes may not be able to be inserted due to 90° angle
- High temperature airstreams
 - Temperatures up to 800°C

Languages

- Multi language capability built into instruments
 - 12 total
- Unique to TSI
- Why important
 - Multi-national companies looking to standardize on equipment
 - Penetrate new regions
 - Builds on TSI's reputation of being a global company

Connecting the Static Pressure Probe

The Static Pressure probe included with the 9565-P is connected to the + port on the 9565-P using the included tubing. The Static Pressure probe is used to measure the duct static pressure and features a magnet which holds the probe to the ductwork.

Connecting an Optional Pitot Probe or Airflow (straight pitot) Probe

When connected to a pitot probe, air velocity or air volume can be measured. A pitot probe can be connected to the "+" and "-" pressure ports on the Model 9565-P using two pieces of tubing of equal length. The total pressure port of the pitot probe connects to the "+" port on the meter, and the static pressure port of the pitot probe connects to the "-" port on the meter.

For information on how to perform a duct traverse, refer to [Application Note TSI-106](#).

NOTE: The pitot velocity needs a valid temperature to perform the standard or actual velocity correction. This is accomplished in the "ActualStd Setup" menu. If no probe capable of measuring temperature (plug in probe or thermocouple) is connected, the "Temp Source" must be set to "Entered". The duct air temperature must then be manually inputted by the user using the "Entered Temp" setting. If the "Temp Source" is set to Probe or Thermocouple 1 or 2, and no probe is connected, dashes (----) will appear on the display.

For more information on entering the temperature manually, refer to the [Actual/Standard Setup](#) section of this manual.

Do not use the instrument or probes near hazardous voltage sources since serious injury could result.

When set to Cont. key, the log interval can be adjusted.

NOTE: Pressing the ▲▼ keys simultaneously will lock the keypad to prevent unauthorized adjustments to the increments during unattended logging. A "Lock" symbol will appear on the display. To unlock the keypad, press the ▲▼ keys simultaneously. The "Lock" symbol will disappear.

Cont-time Logging

In Cont-time mode, the user starts taking readings by pressing the ← key. The instrument will continue taking samples until the time as set in "Test Length" has elapsed.

When set to Cont-time, the log interval and test length can be adjusted.

NOTE: Pressing the ▲▼ keys simultaneously will lock the keypad to prevent unauthorized adjustments to the increments during unattended logging. A "Lock" symbol will appear on the display. To unlock the keypad, press the ▲▼ keys simultaneously. The "Lock" symbol will disappear.

Program 1 and Program 2

Program 1 and Program 2 are customized data logging setup programs. Setup of them up is performed using TSI's TRACPRO™ Data Analysis software.

ENERGY AND COMFORT

Ventilation Test Instruments

Specifications
VELOCALC
Models 9565, 9565-A, 9565-P, 9565-X and Optional Probes

Velocity (Pitot or Airflow) probe for Meter Models 9565, 9565-A, 9565-P
Range: 0.25 to 15,000 ft/min (0.27 to 16.7 m/s)
Accuracy: ±1.5% at 2,000 ft/min (7.62 m/s)
Resolution: 1 ft/min (0.01 m/s)

Over Size
Openings: 1 to 500 inches in increments of 0.1 in. (2.5 to 12.70 cm in increments of 0.1 cm)

Volume Flow Rate
Range: Actual range is a function of velocity, pressure, duct size, and % factor

Static Differential Pressure (Meter Models 9565, 9565-A, 9565-P)
Range: -15 to +15 in. H₂O (-26.0 to +26.0 mm Hg)
Accuracy: ±0.25 to ±0.75 Pa
Resolution: ±1% of reading at 0.005 in. H₂O (±0.01 mm Hg, ±1 Pa)
Accuracy: 0.001 in. H₂O (0.1 Pa, 0.01 mm Hg)

Barometric Pressure
Range: 20.36 to 30.64 in. Hg (21.715 to 33.027 mm Hg)
Accuracy: ±2% of reading

Instrument Temperature
Range: 40 to 113°F (5 to 45°C)
Operating (Electronics): 4 to 140°F (-20 to 60°C)

Storage
Range: -4 to 140°F (-20 to 60°C)

Data Storage Capabilities
Range: 25,500+ samples and 100 test IDs

Logging Interval
1 second to 1 hour

Time Counted
User selectable

General Meter Dimensions
3.8 in. x 8.3 in. x 2.1 in. (9.7 cm x 21.1 cm x 5.3 cm)

Met weight with Batteries
0.8 lbs. (0.36 kg)

Power Requirements
Four AA-size batteries or AC adapter

To Order
Multi-Function Ventilation Meter with differential pressure sensor and Thermocouple Probe
9565: Multi-function ventilation meter 9565-P with straight air velocity probe Model 954
9565-A: Multi-function ventilation meter 9565-P with orificed air velocity probe Model 952

Multi-Function Ventilation Meter Only Choose a probe most appropriate for your measurement needs:
9565-X: Multi-function ventilation meter; no plug-in probes, no differential pressure sensor
9565-P: Multi-function ventilation meter; no plug-in probes, with differential pressure sensor, tubing and static pressure probe

NOTE: All models include instrument, hard carrying case, 4 alkaline batteries, USB cable, universal power supply, instruction manual, calibration certificate, LoCal2 and FieldView downloading software.
Models 9565, 9565-A and 9565-P also include (1) 9/4 in. (2.4-cm) rubber tube and (1) static pressure tip.

1. The data value shown on the meter is not incremental below 1000 ft/min (305 m/s) and is not subject to resolution error 2,000 ft/min (16.7 m/s). Range can only display in increments of 1000 ft/min.
 2. Accuracy is a function of operating pressure (velocity). Converter accuracy depends on the probe used.
 3. Operating range is 10 to 14.0 (305 mmHg, 40 kPa).
 4. Temperature compensated over an air temperature range of 5 to 40°C.
 5. Resolution is 0.25 mmHg at 10 kPa through 10,000 ft/min (8.15 m/s) and 0.75 mmHg at 10,000 ft/min through 15,000 ft/min (12.7 m/s).
 6. Accuracy with static tip is ±1.5% at 2,000 ft/min (7.62 m/s) and ±1.5% at 10,000 ft/min (8.15 m/s).
 7. Accuracy with static tip is ±1.5% at 2,000 ft/min (7.62 m/s) and ±1.5% at 10,000 ft/min (8.15 m/s).
 8. Accuracy with static tip is ±1.5% at 2,000 ft/min (7.62 m/s) and ±1.5% at 10,000 ft/min (8.15 m/s).
 9. A calibration certificate of accuracy of 0.002 in. H₂O (0.2 Pa) is included in the package.

ENERGY AND COMFORT

Ventilation Test Instruments

Model 9565

VELOCALC®
Multi-Function Ventilation Meter
Series 9565

The 9565 VeloCALC Series are portable, handheld, Multi-Function Ventilation Test Instruments featuring a menu-driven user interface for easy operation in your local language. On-screen prompts and step-by-step instructions guide the user through operation. Instrument setup and field calibration. The 9565 also features an ergonomic, over-molded case design with probe holder and a keypad lockout to prevent tampering during unattended use. These instruments are available with or without a differential pressure sensor and are designed to work with a wide range of plug-in probes.

Applications

- HVAC testing and balancing
- Clean room testing
- Biological safety cabinet and laboratory fume hood testing
- HVAC commissioning and troubleshooting
- IAQ investigations
- Thermal comfort studies
- Ventilation evaluations
- Process air flow testing

Features and Benefits

- Best in class air velocity accuracy
- Optional "smart" plug-in probes, including VDC, CO₂ and rotating vane probe
- Accommodates up to two K-type thermocouples
- Large graphic display
 - Displays up to 5 measurement simultaneously
 - On-screen messages and instructions
 - Program for local language
- Intuitive menu structure allows for ease of use and setup
- Multiple data logging formats
- Bluetooth communications for transferring data or remote polling
- Includes TrueView™ and LoCal2™ downloading software with USB cable

9565-95650001_001 3/9/2011 5:23 PM Page 3

VeloCalc Plug-In Probes

The plug-in probe allows users to make various measurements by simply plugging in a different probe that has the features and functions best suited for a particular application.

Plug-in probes for the 9565 VeloCalc series can be ordered at any time and include a data sheet with certificate of traceability. When it's time for servicing, only the probe heads to be returned since all the calibration data is stored within the probe.

Thermocouple Air Velocity Probes

TSI offers four models featuring multiple measurements in a compact round probe design. Their telescopic probe is available in straight or articulating construction, and with or without relative humidity sensor. Models with a relative humidity sensor can also calculate wet bulb and dewpoint temperature.

Common applications include duct traversing, face velocity testing of chemical fume hoods, biological safety cabinets, and HEPA filters. When combined with the 9565, advanced measurement applications can be performed including heat flow, draft rate and turbulence intensity.

Rotating Vane Anemometer Probes

Rotating vane probes are available in 1.5" (26 mm) and 4" (100 mm) diameters, and measure air velocity and temperature with flow calculation. Measurement applications include face velocity as well as air velocity in turbulent air streams. An optional telescopic articulating probe is available for both models, and an AirCore Kit is available for the 4" vane head model.

Pitot Probes and Airflow Probe 900187

Pitot probes are used to obtain air velocity and air volume measurements within ductwork by performing a duct traverse. Consult factory for sizes and part numbers.

The Airflow Probe Model 900187 is an 18" (46 cm) long straight Pitot probe that can be used to perform duct traverses and is ideally suited for measuring in small diameter ductwork.

LogDat™ Downloading Software

The VeloCalc Model 9565 Series includes downloading software called LogDat2. LogDat2 software transfers the stored data from the Model 9565 to a computer as a spreadsheet. This software is useful for applications such as duct traverses, fume hood, and filter face velocity testing.

| Reading Type | Standard | Temperature | 30degF |
|--------------|----------|-------------|--------|
| Model | Channel | Unit | Temp |
| Velocity | Vel | ft/min | 10.0 |
| Temp | Temp | degF | 32.0 |
| Humidity | Hum | %RH | 50.0 |
| Pressure | Pres | in. Hg | 30.0 |
| Wet Bulb | WB | degF | 50.0 |
| Dew Point | DP | degF | 50.0 |
| Heat Flow | HF | Btu/hr | 100.0 |
| Draft Rate | DR | ft/min | 10.0 |
| Turbulence | TUR | % | 10.0 |
| Velocity | Vel | ft/min | 10.0 |
| Temp | Temp | degF | 32.0 |
| Humidity | Hum | %RH | 50.0 |
| Pressure | Pres | in. Hg | 30.0 |
| Wet Bulb | WB | degF | 50.0 |
| Dew Point | DP | degF | 50.0 |
| Heat Flow | HF | Btu/hr | 100.0 |
| Draft Rate | DR | ft/min | 10.0 |
| Turbulence | TUR | % | 10.0 |

Data Collection and Reporting

Expanded data logging capacity and the inclusion of TRAKPRO Data Analysis Software provides the capabilities to work more effectively and efficiently. The 9565 can store up to 38.9 days of data collected at one-minute log intervals. The stored data can be recalled, reviewed on screen, and downloaded for easy reporting.

- Log multiple parameters to investigate trends.
- Store up to 38.9 days of data collected at one-minute log intervals.
- User-selectable logging intervals and start/stop times.
- Download data to TrakPro data analysis software.
- Report generation.
- Instrument programming.
- Graph creation.

Probe Specifications

Models 960, 962, 964, 966, 968, 969, 984, 986, 988, 989, 995, 996, 997, 792, 794, 984, 985, 986, and 987

960 Thermocouple Straight Probe Velocity and Temperature
 Range: 0 to 1000 ft/min (0 to 305 m/s) (10 to 30°C)
 Accuracy: ±2% of reading or ±0.1 ft/min (±0.03 m/s), whichever is greater
 Resolution: 1 ft/min (0.1 m/s) (0.1°C)

962 Thermocouple Articulating Probe Velocity and Temperature
 Range: 0 to 1000 ft/min (0 to 305 m/s) (10 to 30°C)
 Accuracy: ±2% of reading or ±0.1 ft/min (±0.03 m/s), whichever is greater
 Resolution: 1 ft/min (0.1 m/s) (0.1°C)

964 Thermocouple Straight Probe Velocity, Temperature and Humidity
 Range: 0 to 1000 ft/min (0 to 305 m/s) (10 to 30°C)
 Accuracy: ±2% of reading or ±0.1 ft/min (±0.03 m/s), whichever is greater ±0.5% RH
 Resolution: 1 ft/min (0.1 m/s) (0.1°C)

966 Thermocouple Articulating Probe Velocity, Temperature and Humidity
 Range: 0 to 1000 ft/min (0 to 305 m/s) (10 to 30°C)
 Accuracy: ±2% of reading or ±0.1 ft/min (±0.03 m/s), whichever is greater ±0.5% RH
 Resolution: 1 ft/min (0.1 m/s) (0.1°C)

486 Rotating Vane 1.5 in. (38 mm) Velocity and Temperature
 Range: 100 to 3000 ft/min (30 to 914 m/s) (10 to 140°F) (10 to 60°C)
 Accuracy: ±2% of reading or ±10 ft/min (±3.05 m/s) (±0.5°C)
 Resolution: 1 ft/min (0.1 m/s) (0.1°C)

995 Rotating Vane 4 in. (100 mm) Probe Velocity and Temperature
 Range: 50 to 600 ft/min (15 to 183 m/s) (20 to 140°F) (10 to 60°C)
 Accuracy: ±2% of reading or ±10 ft/min (±3.05 m/s) (±0.5°C)
 Resolution: 1 ft/min (0.1 m/s) (0.1°C)

980 3-in. Probe CO₂, Temperature and Humidity
 Range: 0 to 5.00 ppm CO₂, 0 to 20% RH, 10 to 140°F (10 to 60°C)
 Accuracy: ±2% of reading or 0.50 ppm, whichever is greater
 CO₂: ±0.2% RH ±0.5°C
 Resolution: 1 ppm CO₂, 0.1% RH (0.1°C)

982 3-in. Probe Moist CO₂, Temperature and Humidity
 Range: 0 to 5.00 ppm CO₂, 0 to 20% RH, 10 to 140°F (10 to 60°C)
 Accuracy: ±2% of reading or 0.50 ppm, whichever is greater
 CO₂: ±0.2% RH ±0.5°C
 Resolution: 0.1 ppm CO₂, 0.1% RH (0.1°C)

702 and 704 Thermocouple Probe Temperature
 Range: 40 to 1500°F (10 to 800°C)
 Accuracy: ±0.1% of reading or ±0.5°C (±0.9°F)
 Resolution: 0.1°F (0.1°C)

964 Low Concentration (ppm) CO₂ and Temperature
 Range: 0 to 2000 ppm, 10 to 30°C (10 to 140°F)
 Accuracy: ±2% of reading or 0.50 ppm, whichever is greater
 Resolution: 1 ppm CO₂, 0.1°C (0.1°F)

966 High Concentration (ppm) CO₂ and Temperature
 Range: 1 to 2.00 ppm, 10 to 60°C (10 to 140°F)
 Accuracy: ±2% of reading or 0.50 ppm, whichever is greater
 Resolution: 1 ppm CO₂, 0.1°C (0.1°F)

986 Low Concentration (ppm) CO₂ and Humidity
 Range: 0 to 2000 ppm, 0 to 5.00 ppm CO₂, 10 to 60°C (10 to 140°F) (10 to 60°C)
 Accuracy: ±2% of reading or 0.50 ppm, whichever is greater
 Resolution: ±0.5°C (±0.9°F) ±0.5% RH
 CO₂: ±0.2% RH ±0.5°C

987 High Concentration (ppm) CO₂, Temperature, CO₂, and Humidity
 Range: 1 to 2.00 ppm, 10 to 60°C (10 to 140°F) (10 to 60°C)
 Accuracy: ±2% of reading or 0.50 ppm, whichever is greater
 Resolution: 1 ppm CO₂, 0.1% RH (0.1°C)

Resources: Old versus New

VelociCalc Meter Comparison: 9565 Versus 9555 Series

VelociCalc 9565 Series Overview

- The VelociCalc 9565 series is a direct replacement for the 9555 series
- Same features and functionality as the 9555
 - Use existing plug-in probes
 - Instrument case look and feel
 - Carrying case and accessories
- 9565 includes additional capabilities
- No change in pricing

Additional Capabilities of the 9565 Series

- Bluetooth bi-directional communications
 - Download stored data to a PC
 - Remote polling from a PC
 - Program Test ID names from a PC
 - Supports 8934 wireless printer
- Supports additional probes
 - Volatile Organic Compounds (VOC) probes
 - Airflow probe model 800187 (straight pitot probe)
- Added four Asian languages
 - Traditional Chinese
 - Simplified Chinese
 - Japanese
 - Korean
- Added dots to soft keys
- Updated instruction manual
- Updated specification data sheet

QTRAK IAQ Monitor Comparison: 7575 Versus 7565
