

## IAQ920 INDOOR AIR QUALITY METER

### Indoor Air Quality Meters

#### Model IAQ920

The Airflow IAQ920 Indoor Air Quality Meter quickly and accurately measures carbon dioxide, temperature, and humidity levels in real time with a single probe. It stores up to 12,700 sets of downloadable readings with time and date stamp. It is the ideal instrument for checking ventilation rates, air changes, investigating indoor air quality, and performing thermal comfort studies.

#### FEATURES AND BENEFITS

- Long-lasting NDIR sensor to monitor CO<sub>2</sub>
- Manual or continuous data logging
- Includes LogDat2 software and interface cable to download to a PC
- Calculates % outside air from CO<sub>2</sub> or temperature
- Displays humidity as %RH, dew point, wet bulb, absolute humidity, or humidity ratio
